

SUSTAINING A BETTER WAY
Our Sustainability Approach: Executive Summary

A MESSAGE FROM OUR CEO

At Sealed Air, sustainability is woven into the fabric of who we are and what we stand for as an enterprise. If I could rename our company, we would be “The Sustainability Company.”

Sustainability is not just part of our business. It is at the heart of everything we do. It is our business.

Our vision is to create a better way for life. It is a vision rooted in sustainability. It inspires us to develop purposeful innovations that not only meet, but exceed our customers’ needs. These innovations protect products, improve the security and safety of the food we eat and improve health by keeping hospitals, hotels, office buildings and other shared environments safe and clean.

Sustainability is even embodied in our brandmark’s Trillian icon, where each edge represents our unmatched values of sustainability, performance and cost-competitiveness.

At Sealed Air, we Re-imagine™ the industries we serve to create a world that feels, tastes and works better. Sustaining that world extends to everything we do.

Sincerely,

A handwritten signature in blue ink, appearing to read "J. Peribere". The signature is fluid and stylized, with a long vertical stroke for the letter "J" and a horizontal line for the underline.

Jerome A. Peribere
President and CEO

Sustainability is not
just part of our business.
It is at the heart of
everything we do.

SMART Helping customers
make informed choices

LIFE Delivering value through
the entire life cycle

OUR SUSTAINABILITY APPROACH

Sealed Air's innovative solutions help our customers meet their sustainability goals in the face of today's biggest social and environmental challenges. Our SmartLife™ initiative takes a holistic approach to sustainability, using life-cycle thinking to look beyond individual product attributes to consider the entire value chain. This customer-centric blueprint is an essential ingredient in how we help our customers win, making informed decisions about sustainability solutions to deliver value throughout their operations.

DRIVING GROWTH

We create better ways for our customers to address their environmental and social challenges by adding value without sacrificing cost-competitiveness or performance, and ensuring long-term growth. We help take costs out of operations and help customers protect and enhance their brands through packaging and cleaning solutions that provide consumer appeal, ensure safe operations and deliver more value.

CONSERVING MORE

We create a better way for life by conserving resources and eliminating waste. This begins with our own operations, managing our use of raw materials, using alternatives to petrochemicals and creating lighter, thinner packaging and highly efficient cleaning solutions. These benefit customers—and ultimately consumers—who are focused on recycling, lowering energy and water use, eliminating product and food damage and eventual waste disposal.

LIVING BETTER

We create a better way for life by driving economic growth through products that extend global distribution, improve access to a secure food supply—safe, more nutritious and less wasteful—and improve health by keeping hospitals, hotels and office buildings safe and clean.

“Sealed Air continues its mission to provide sustainable solutions to our customers and for some of today’s biggest global issues, and to ultimately create a better way for life.”

Jerome A. Peribere
President and CEO

MEETING GLOBAL CHALLENGES

Drawing on our collective areas of expertise, Sealed Air's Food Care, Product Care and Diversey Care Divisions collaborate on developing sustainable solutions to some of the world's most pressing problems.

FOOD SECURITY

As the global demand for food increases, Sealed Air is focused on working with our customers to tackle the three most pressing issues facing the world's food supply—food access, food safety and food waste. Sealed Air creates solutions that protect and enhance the food and beverage supply chain, ensuring products are processed, sold and prepared in a safe and efficient environment.

WATER SECURITY

Almost one-fifth of the world's population lives in areas where water is scarce. The world's demand for fresh water is growing so fast that agriculture, industry and cities are facing scarce supply. Sealed Air is helping customers meet their water reduction sustainability goals through operational efficiencies and ensuring clean and healthy environments.

RESOURCE EFFICIENCY

Sealed Air focuses on resource efficiency by eliminating product damage and waste during shipping while using a minimum amount of packaging. With more and more products being shipped daily around the world, we are providing our customers more sustainable solutions.

A young girl with dark hair, wearing a light pink dress, is sitting and eating from a light-colored plate. She is looking to her right. In the background, a white dog is standing and looking towards the left. The scene is outdoors with some greenery visible. The image is split into two sections by a diagonal line, with the text overlaid on the right section.

a better way for life.

OUR SUSTAINABILITY PILLARS

The essence of our sustainability approach is to bring real and meaningful results to a world where social, environmental and economic needs must all be met. Our pillars highlight how we put sustainability into practice.

Communities & Citizenship

Sealed Air believes that being a good corporate citizen requires the commitment of both our enterprise and the employees who are our most valuable asset. While corporate giving is an important part of our commitment, we take great pride in the talent, energy and imagination our employees devote to helping local communities. Sealed Air brings life to our vision of a better way for life.

- Around the world, employee volunteers provide instruction to thousands of children on the importance of clean hands
- Together with our customers, we provide disaster relief to communities to help them meet their urgent needs for food, water and shelter
- Since 2003, we have sponsored the international non-profit Enactus to bring together student, academic and business leaders to improve quality of life for people in need

Workplace

Sealed Air is committed to being a great place to work, from the recognition we bestow on our people and the opportunities we provide for individual growth and career development, to our emphasis on employee safety and the sustainability of our plants and offices. Our workforce meets the challenges of today's fast-paced global marketplace, and mirrors the diverse markets in which we serve. We are proud to say that we operate our business to the highest ethical standards.

- Achieving zero waste to landfill, by diverting our plastic scrap into other products and uses
- Reducing the water, energy and greenhouse gas emissions of our operations
- Corporate responsibility that ranked Sealed Air as among the "world's most admired companies" by *Fortune* magazine

OUR SUSTAINABILITY PILLARS

Products & Solutions

At Sealed Air, sustainability is redefining the way we innovate products and solutions for business. Our innovations help minimize risk, reduce waste and increase productivity at our customers’ facilities and across the extended supply chain. Now, using sustainability as a guide for innovation, the future holds even more opportunities to benefit the environment and society, while driving economic performance for customers and shareholders. We have integrated sustainability performance into our product development process, focusing on six key areas.

We have integrated sustainability into our product development processes to deliver innovations that create value by:

- Meeting performance requirements of our customers’ businesses
- Ensuring cost competitiveness across our customers’ operations
- Delivering quantifiable sustainability benefits

Partners

As a global company, Sealed Air believes that collaborating with organizations outside of our company is the best solution for addressing some of the world’s biggest sustainability needs. Our vital partnerships with government agencies, non-governmental organizations, certification organizations, industry groups, customers and suppliers allow us to share our expertise and draw on the value of creative, passionate people uniting their talents toward a common goal. A truly sustainable world will only be possible through education and development initiatives sparked by collaboration.

Sealed Air draws on the value of creative, passionate people uniting their talents toward a common goal.

SEALED AIR OVERVIEW

Sealed Air Re-imagines the industries we serve to create a world that feels, tastes and works better—from ensuring the safety of what we eat and drink to protecting the valuable goods we ship and receive daily to improving our health and well-being through clean environments. Every day, we re-think what is possible and discover new approaches and applications to create a better way forward. Our diverse expertise and powerful brands result in sustainable, end-to-end solutions that transform businesses to enhance the world we live in.

We do this because we believe everyone deserves a thriving tomorrow.
